

Our Services

Managed IT Support

Reliable and proactive IT support to keep your operations running smoothly.

Key Features:

- 24/7 Monitoring & Issue Resolution
- Onsite & Remote Technical Support
- Help Desk Services
- Patch Management & System Updates
- Data Backup & Disaster Recovery
- Asset & License Management

Benefit: Minimize downtime, increase efficiency, and focus on your core business while we manage your technology.

Data Center Solutions

Robust, scalable, and secure data infrastructure built for performance and continuity.

Key Features:

- Custom Architecture & Capacity Planning
- Server Room Deployment & Cabling
- Virtualization & Cloud Integration
- High Availability & Redundancy
- Centralized Monitoring Systems
- Disaster Recovery & Business Continuity

Benefit: Empower your digital infrastructure with future-ready solutions built to scale and protect.

Network Infrastructure & Firewall Services

Secure, high-performance networks tailored to Yemen's environment.

ALMAZEN delivers resilient network infrastructure and intelligent security solutions built to support business continuity and defend against evolving cyber threats. From cabling to firewalls, we design and deploy systems that keep you connected and protected.

Key Features:

- Next-gen firewalls and Unified Threat Management (UTM)
- Localized threat intelligence and CERT-compliant rule sets
- Smart switching and PoE+ routing
- 24/7 monitoring with real-time alerts (SMS/WhatsApp)
- Structured Cat6A/Cat7 & fiber cabling with surge and dust protection
- LAN/WAN architecture adapted to Yemen's terrain and power grid
- Wi-Fi 6/6E & outdoor mesh access points with load shedding resilience

Benefit: Strengthen your connectivity backbone with infrastructure engineered for Yemen's unique conditions and aligned with global security standards.

Consulting & Project Management

Expert guidance to deliver successful technology transformations.

Key Features:

- IT Strategy & Roadmaps
- Digital Transformation Planning
- Feasibility & Scoping Studies
- Project Implementation & Supervision
- Risk Management & QA
- Transparent Reporting & Communication

Benefit: Achieve business goals with technology that's delivered on time and within scope.

Training & Workshops

Build your team's IT capacity with tailored learning experiences.

Key Features:

- Technical Training (Cloud, Networking, Cybersecurity)
- Product-Specific Workshops (Lenovo, Fortinet, etc.)
- End-User Education
- IT Governance & Best Practices
- Onsite & Remote Training
- Certification Preparation

Benefit: Empower your workforce to embrace technology with confidence and skill.
